

How to Cast on:

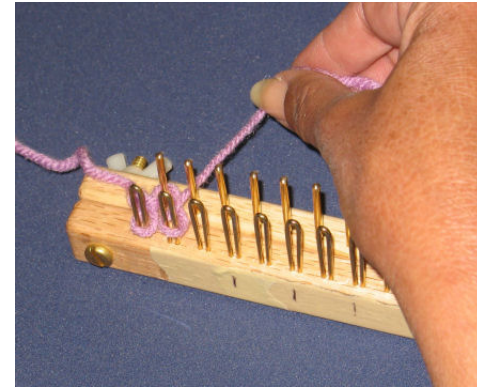

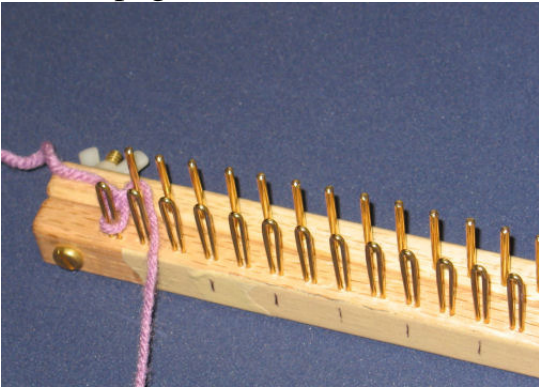

Written by Graciela Worth © August 20, 2007

E-wrap method:

Make a slip Knot and place it on the first peg, move the yarn to the back, and go around the first pin:

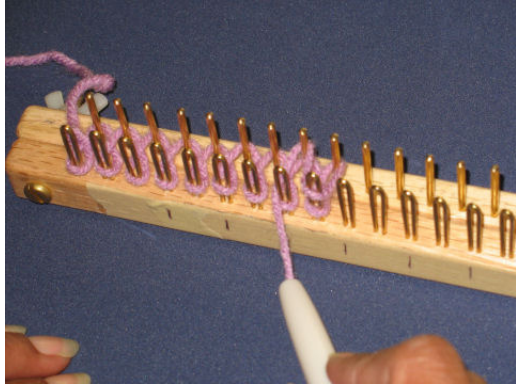

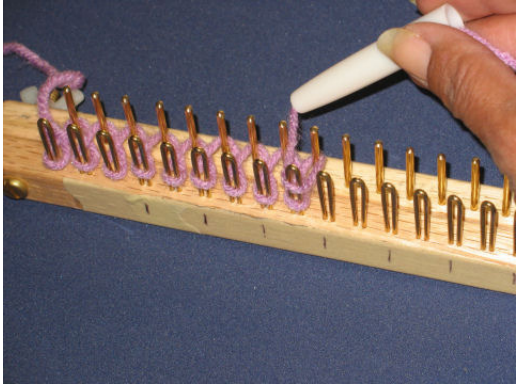

Move the yarn to the front to go around the second peg, and e-wrap the second peg.

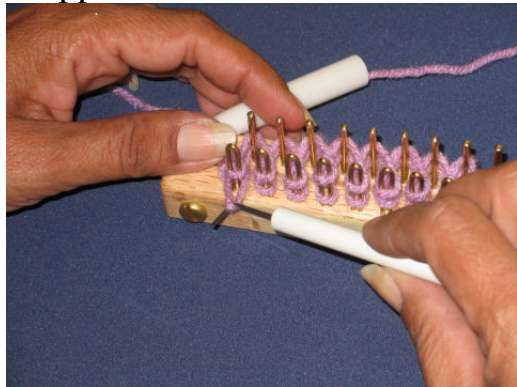

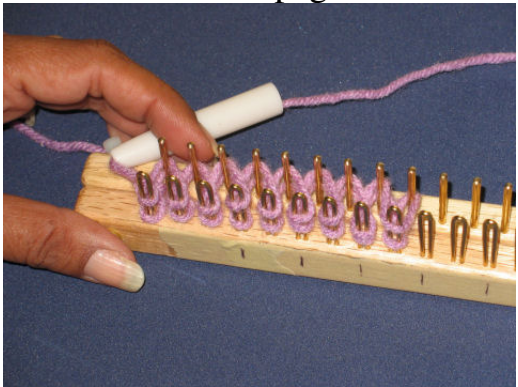

Again go to the back pin, the second one, placing the yarn around the second pin, go to the 3rd. peg and e-wrap it. Continue like this for the amount of pegs, you want to cast on.

To turn around: move the yarn to the front peg, last one that you e-wrapped, then move the yarn behind the second pin, move the yarn to the front of the second peg, and e-wrap the second peg.

Continue until all pegs have been e-wrapped.

Continue this process for your basic e-wrap stitch.
